

## **Automated External Defibrillator Policy**

The School may have an automated external defibrillator that is approved for use as a medical device by the United States Food and Drug Administration for performing the automated external defibrillation, as defined in section 2305.235 of the Ohio Revised Code.

If the School has an automated external defibrillator, a sufficient number of staff members will successfully complete an appropriate training course in the use of an automated external defibrillator as described in section 3701.85 of the Ohio Revised Code.

Except in the case of willful or wanton misconduct, or when there is no good faith attempt to activate an emergency medical services system in accordance with section 3701.85 of the Ohio Revised Code, no person shall be held liable in civil damages for injury, death, or loss to person or property, or held criminally liable, for performing automated external defibrillation in good faith, regardless of whether the person has obtained the appropriate training on how to perform automated external defibrillation or successfully completed a course in cardiopulmonary resuscitation.
